How to Calculate Your Maintenance Calories 🔥

Swipe / tap to learn the exact method

👇

Step 1 – Find Your Basal Metabolic Rate (BMR

Step 1: Your body burns calories even at rest — this is your BMR. Here's the simplest formula:

Step 2 – Factor in Activity

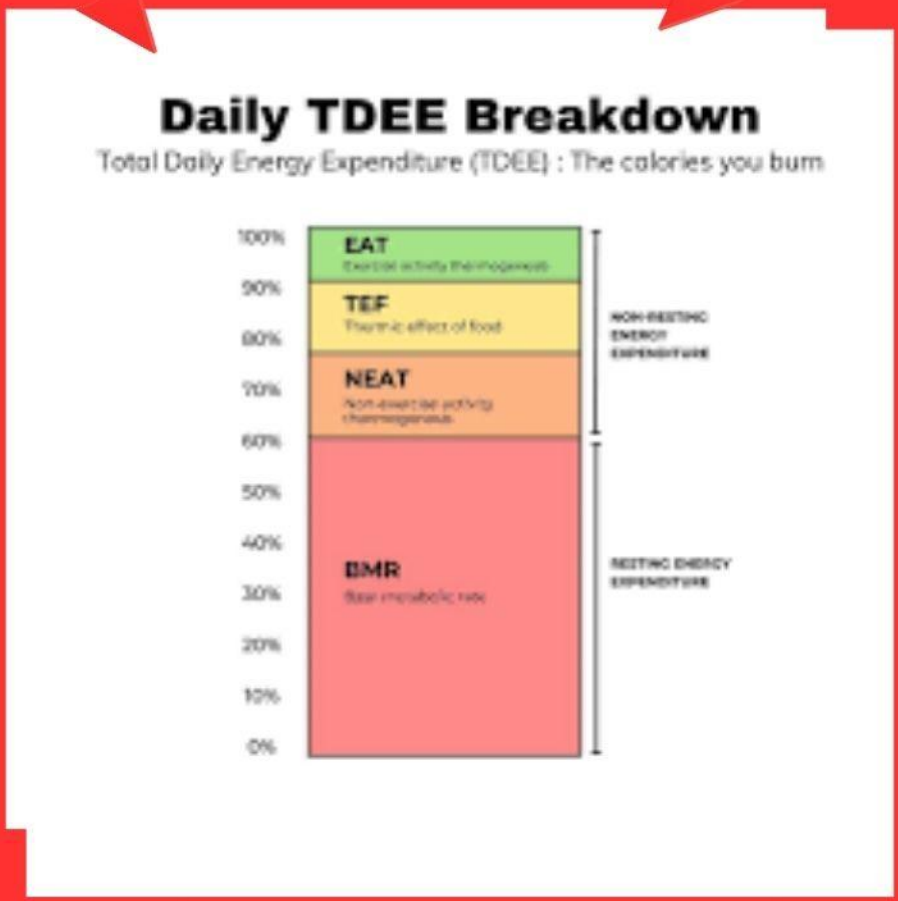

step 2: Multiply your BMR by your activity level to see your Total Daily Energy Expenditure (TDEE)

Which activity level are you? Comment below 👇

Step 3 – Track and Adjust

Track your calories for a week and adjust. Your maintenance calories = where your weight stays stable.

use this for fat loss or muscle gain 💪"
