THE COMPLETE SYSTEM

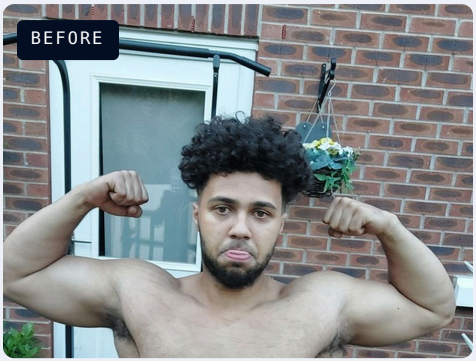

THE HOME SHRED BLUEPRINT

How to lose fat, keep your muscle and get lean at home. Your calories, your protein, your 4-day training plan and the exact way to progress it.

BY KYE PRESCOD · LEVEL 2 GYM INSTRUCTOR · @PRESKI_FITNESS

READ THIS FIRST

I TOOK THE LONG WAY. THIS IS THE SHORTCUT.

Growing up I was smaller than everyone. So I dirty bulked on sugar, oils and takeaways. I got bigger, but I also got puffy and soft. Then I learned how to cut properly, **at home**, with two 12.5 kg dumbbells, a chair and the floor.

This blueprint is everything I wish someone had handed me on day one. No gym, no fancy kit, no fad diet.

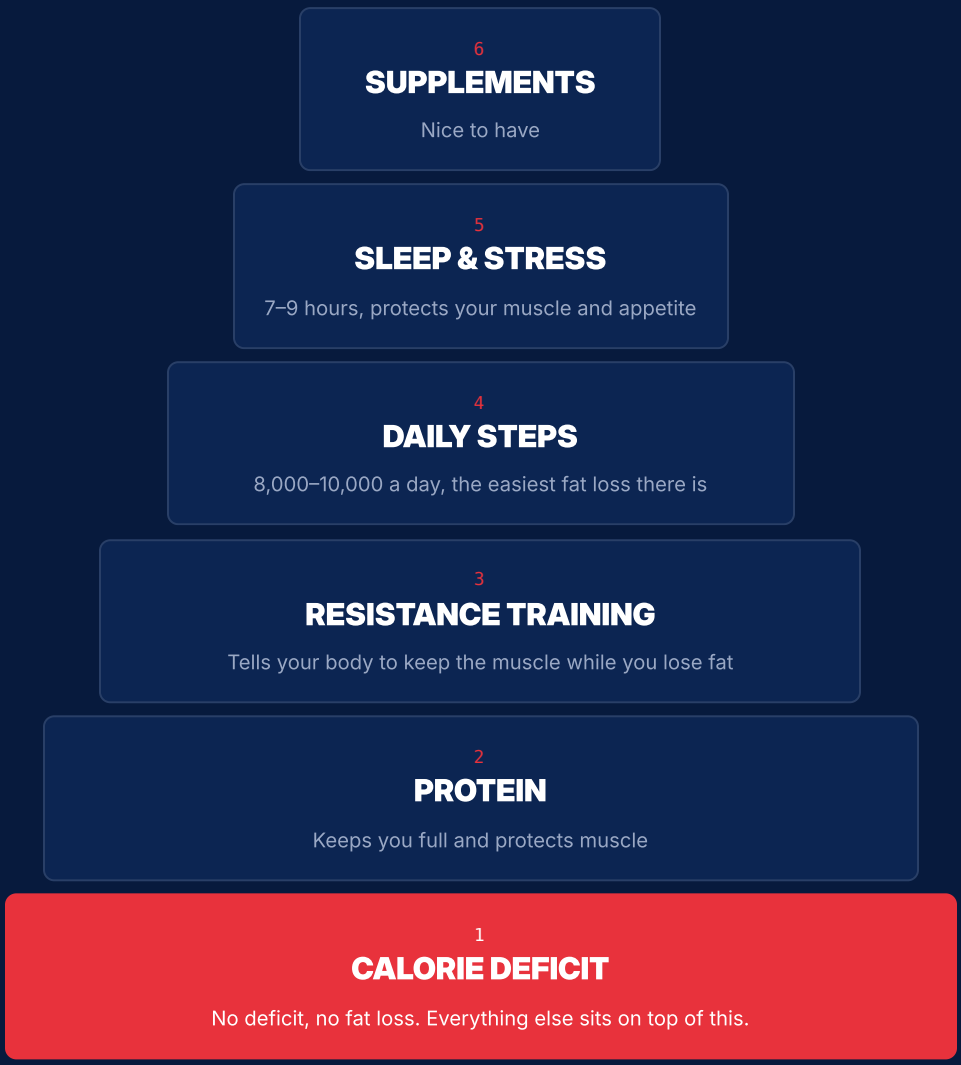

WHAT'S INSIDE

The Shred Pyramid: what actually matters	3
Step 1 · Find your calories	4
Step 2 · Set your protein and macros	5
Step 3 · Your 4-day home training plan	6
Step 4 · Progress without a gym	8
Step 5 · Steps, sleep and hunger	10
The 7 shred-killers · Tracking · Plateaus	11

THE SHRED PYRAMID

DO THE BIG THINGS FIRST

Most people start at the top of this pyramid (supplements, "fat-burning" workouts) and ignore the base. Build from the bottom up.

STEP 1

FIND YOUR CALORIES

Three numbers: what you burn at rest, what you burn in a day, and what you'll eat to lose fat.

A · RESTING BURN (BMR, MIFFLIN-ST JEOR)

```
Men   = (10 × kg) + (6.25 × cm) − (5 × age) + 5
Women = (10 × kg) + (6.25 × cm) − (5 × age) − 161
```

B · MULTIPLY BY YOUR ACTIVITY

Desk job, little exercise	× 1.2
1–3 sessions a week	× 1.375
3–5 sessions + daily walking (most people on this plan)	× 1.55
Hard training 6–7 days or a physical job	× 1.725

This gives your **maintenance**: the calories that keep your weight the same.

C · YOUR FAT LOSS TARGET

```
Maintenance × 0.80 = fat loss calories
```

Want it gentler? Use × 0.85. Never go below your BMR. **My target: _____ kcal**

WORKED EXAMPLE · JORDAN, 30, 178 CM, 85 KG, TRAINS 4×/WEEK

BMR = 850 + 1,112.5 − 150 + 5 = **1,818**
Maint = 1,818 × 1.55 = **2,817**
Target = 2,817 × 0.80 = **≈ 2,250 kcal a day**

STEP 2

PROTEIN FIRST, THEN THE REST

PROTEIN

2 g

per kg bodyweight (1.6–2.2 g works). Hit this every day.

FAT

0.8 g

per kg bodyweight. Keeps hormones and energy healthy.

CARBS

Rest

Whatever calories are left. Fuel for training.

JORDAN'S NUMBERS (2,250 KCAL, 85 KG)

MACRO	GRAMS	CALORIES
Protein · 85 × 2	170 g	680
Fat · 85 × 0.8	68 g	612
Carbs · (2,250 − 680 − 612) ÷ 4	240 g	958

Protein and carbs = 4 kcal per gram. Fat = 9 kcal per gram.

DON'T WANT TO TRACK? USE YOUR HAND.

PER MEAL	MEN	WOMEN
Protein (palm)	2 palms	1 palm
Veg (fist)	2 fists	1 fist
Carbs (cupped hand)	2 handfuls	1 handful
Fats (thumb)	2 thumbs	1 thumb

3–4 meals a day. Not losing after 2 weeks? Drop 1 carb handful a day.

STEP 3 · YOUR HOME PLAN

4 DAYS. 25–45 MINS. ZERO GYM.

Pick **Level 1** if you have no equipment, **Level 2** if you have dumbbells. Rest 60–90 s between sets.

DAY 1 · UPPER PUSH

LEVEL 1 · BODYWEIGHT	LEVEL 2 · DUMBBELLS	SETS × REPS
Push-ups (incline if needed)	Dumbbell floor press	4 × 8–12
Chair tuck dips	Captain's chair dips	3 × 8–12
Pike push-ups	Seated dumbbell press	3 × 8–12
Backpack lateral raise	Dumbbell lateral raise	3 × 12–20
Diamond push-ups	Lying tricep extension	2 × 10–15

DAY 2 · LEGS

LEVEL 1 · BODYWEIGHT	LEVEL 2 · DUMBBELLS	SETS × REPS
Bulgarian split squat	DB Bulgarian split squat	4 × 8–12 /leg
Single-leg glute bridge	Dumbbell Romanian deadlift	3 × 10–15
Slow tempo squat (3 s down)	Goblet squat	3 × 12–15
Reverse lunge	DB reverse lunge	2 × 10 /leg
Single-leg calf raise	DB single-leg calf raise	3 × 12–20

DAY 3 · PULL + ABS

LEVEL 1 · BODYWEIGHT	LEVEL 2 · DUMBBELLS	SETS × REPS
Table rows / door-frame rows	One-arm dumbbell row	4 × 8–12
Backpack bent-over row	Dumbbell pullover	3 × 10–12
Prone Y-T raises	Rear-delt fly	3 × 12–15
Backpack curls	Hammer curls	3 × 10–15
Lying knee raises	Captain's chair knee raises	3 × 10–15
Crunch (2 s squeeze)	Weighted crunch	3 × 12–15

DAY 4 · CONDITIONING + CORE

WHAT	HOW MUCH
Brisk walk, incline walk or weighted-vest walk	30 min
Skipping or high knees (30 s rest)	5 × 1 min
Hollow hold	3 × 20–40 s
Side plank	2 × 30 s /side

YOUR WEEK

Mon · Day 1	Tue · Day 2	Wed · Walk	Thu · Day 3
Fri · Walk	Sat · Day 4	Sun · Rest	

Miss a day? Do it the next day. Never skip two in a row.

STEP 4

HOW TO PROGRESS WITHOUT A GYM

Muscle grows when the job gets harder over time. At home you can't just add a plate, so climb this ladder instead.

THE RULE

When you hit the **top of the rep range on every set**, move up one rung for that exercise next session.

01 ADD REPS
8 → 12 with the same exercise.

02 SLOW IT DOWN
3 seconds on the way down. Same reps feel twice as hard.

03 ADD A PAUSE
1–2 s at the hardest point (bottom of a push-up, top of a row).

04 HARDER VARIATION
Incline → full → deficit → archer push-up.

05 ADD LOAD
Backpack with books, weighted vest, heavier dumbbells.

06 CUT THE REST
90 s → 60 s between sets.

HOW HARD?

Finish most sets with **1–3 reps left in the tank**. Good form every rep. If your form breaks, the set is over.

YOUR 4-WEEK BUILD-UP

WEEK	SETS	EFFORT	FOCUS
1	3 per exercise	2–3 reps in reserve	Learn the moves, film your form, set your calories
2	3 per exercise	1–2 in reserve	Beat last week's reps on every exercise
3	4 on the first two exercises	1–2 in reserve	Add the slow 3 s lowering everywhere
4	4 on the first two exercises	Last set 0–1 in reserve	Test yourself. Move up a rung where you earned it
5	2 per exercise	Easy	Lighter week. Recover, then repeat weeks 2–4 harder

EXAMPLE · PUSH-UPS OVER 4 WEEKS

Week 1	3 × 8 incline push-ups (hands on sofa)
Week 2	3 × 12 incline push-ups
Week 3	4 × 8 full push-ups, 3 s down
Week 4	4 × 10 full push-ups, 3 s down

Write every session down (reps and weight). If you aren't tracking it, you're guessing.

STEP 5

STEPS, SLEEP AND HUNGER

STEPS

8–10k

a day. Walking burns real calories without making you hungrier like hard cardio can. A walking pad or a walk after each meal makes it easy.

SLEEP

7–9 h

a night. Short sleep makes you hungrier and makes it harder to keep muscle while you cut.

HUNGER FIXES THAT ACTUALLY WORK

- **Protein first** at every meal. It's the most filling food there is.
- **Volume foods:** potatoes, berries, veg, soups, popcorn. Big plates, fewer calories.
- **Drink 2–3 L of water.** Thirst often feels like hunger.
- **Zero-calorie drinks** instead of fizzy drinks and juice.
- **Plan your treats.** Fit 10–20% of your calories as food you love. Banning food is why diets fail.

SUPPLEMENTS WORTH THE MONEY

Whey protein (convenience, not magic), creatine monohydrate 3–5 g a day, and vitamin D in the UK winter. Everything else is optional.

AVOID THESE

THE 7 SHRED-KILLERS

01 CUTTING TOO HARD

1,200 calories and two hours of cardio lasts a week. Then you binge. A 20% deficit lasts long enough to work.

02 LOW PROTEIN

You lose muscle and end up smaller but still soft. That's "skinny-fat".

03 WEEKEND BLOWOUTS

500 under for 5 days = 2,500. Then 1,250 over on Saturday and Sunday wipes out all of it.

04 NO PROGRESSION

Same push-ups, same reps, for months. Your body has no reason to keep muscle.

05 PANICKING AT THE SCALE

Water swings 1–2 kg day to day. Judge the weekly average, not today.

06 DRINKING YOUR CALORIES

Lattes, juice, fizzy drinks and alcohol add up fast and don't fill you up.

07 RESTARTING EVERY MONDAY

One bad meal isn't a bad week. Get the next meal right and keep going.

TRACK IT

YOUR WEEKLY CHECK-IN

Weigh yourself every morning after the toilet, before food. Write down the 7-day average. Measure your waist at the belly button once a week.

WEEK	AVG WEIGHT	WAIST	AVG STEPS	SESSIONS	ENERGY /10
1				/4	
2				/4	
3				/4	
4				/4	
5				/4	
6				/4	
7				/4	
8				/4	

WHAT GOOD PROGRESS LOOKS LIKE

Losing about **0.5–1% of your bodyweight a week**. For an 85 kg person that's roughly 0.4–0.85 kg. Faster than that and you risk losing muscle.

STUCK FOR 2 WEEKS IN A ROW?

Check you've actually hit your calories every day, weekends included. If you have: drop 100–150 kcal a day **or** add 2,000 steps a day. Change one thing, then wait 2 more weeks.

Photos: front, side and back on day 1 and every 4 weeks. Same spot, same light, same time of day. The mirror lies less than you think.

WHAT NEXT

WANT ME TO DO THIS WITH YOU?

This blueprint gives you the system. Coaching gives you **me**: a plan built around your kit, your food and your week, checked and adjusted every single week until you get there.

- Training plan built for your space and equipment
- Calorie and protein targets with food you actually like
- Weekly check-ins and plan changes
- Form reviews: send me your videos, I'll fix your technique
